

The 2nd International Conference on Lifespan Innovation (ICLI 2026)

June 11-12, 2026 | Online

博雅精專

Welcome to the 2nd International Conference on Lifespan Innovation (ICLI 2026), which will be held fully online from June 11-12, 2026, hosted by **Polus International College** and **Association of Thai Innovation and Invention Promotion (ATIP)** in cooperation with international partners. The conference theme, **"Sustainable Management and Interdisciplinary Strategies on Lifespan Innovation,"** brings together experts from various fields to share innovations and strategies related to aging.

ICLI 2026 will feature five key tracks including Health and Medicine, Society and Humanities, Business and Economics, Technology, and Psychology. This offers a platform for global discussion on aging and longevity. According to the Abstracting and Indexing of the proceeding series in **Advances in Health Sciences Research (Atlantis Press, part of Springer Nature)**, we are pleased to announce that selected titles will be submitted for evaluation in CPCI (part of Clarivate Web of Science), China National Knowledge Infrastructure (CNKI, 中国知网), and Google Scholar indexing after double-blind review by three peer reviewers. Where applicable, they are also submitted to Ei Compendex and Scopus subject to acceptance.

Furthermore, authors of selected papers will be invited to submit an extended version of their work to the **Journal of ICT Standardization (JICTs)**. The extended journal paper must include at least 30 to 40% new material. It must feature a new title and explicitly cite the original conference publication to comply with publisher regulations. We must clarify that the extended publication is under the exclusive consideration of JICTs and their association. It is not under Springer Nature or Atlantis Press. The peer review and publishing decisions for the journal extension are strictly managed by JICTs. Interdisciplinary studies combining health science with information technology are welcome if they focus on the technology aspect. Authors from the technology track and health science fields utilizing technology are highly encouraged to explore this extension opportunity. We warmly invite students, researchers, and professionals to participate in this event.

TECHNICAL TRACKS

Health and Medicine

- Healthcare for Longevity
- Diseases Prevention and Treatment for Longevity
- Medication and Mental Health Care for Longevity
- Wellness Technology for Longevity
- Boosting Immunity and Overall Health in Aging

Society and Humanities

- Social and Cultural Changes for Longevity
